SUMMARY

Product-minded backend/full-stack engineer who ships real systems: backend services, databases, auth, integrations, real-time features, and deployment. Strong in TypeScript/JavaScript and Python; reliable at integration work, debugging, and production hardening.

CORE SKILLS

Backend: Node/Express/NestJS, FastAPI, REST/GraphQL, WebSockets/Socket.IO, auth & sessions, Python

Data: PostgreSQL + Prisma, MongoDB/Mongoose, schema design & migrations

Delivery: Docker, Nginx, SSL/HTTPS, VPS ops, GitHub Actions CI

Testing: Playwright, Jest/Vitest, Pytest (project-level)

EXPERIENCE

Independent Full-Stack Engineer — Trainium (e-commerce + admin)

Aug 2025 – Present | Solo

- Built storefront + admin workflows with auth/roles, multilingual UX, real-time notifications, and Stripe/Toss test payments.
- Owned architecture, data models, and VPS deployment (Docker + Nginx + SSL/HTTPS) with reliability hardening.

AI Trainer (Contractor) — EBIT Co., Ltd.

Dec 2025 – Present | Remote

- Code review + debugging + quality evaluation for AI training workflows; communicate fixes clearly in English.
- Design repository-based software engineering benchmark tasks for AI systems in Terminal-Bench/Harbor-style environments, focused on full-stack implementation, debugging, environment setup, existing codebase modification, and verifier-backed correctness.

Full-Stack Developer Intern (Product Integration & Delivery) — Sejong Univ. Research Lab

Oct 2025 – Present | Seoul

- Owned end-to-end delivery via backend integration (BFF wiring, auth/session fixes, API contract alignment).
- Rumi AI: multilingual UI (incl. RTL) + integration of Python services; shipped stability-focused improvements.
  GitHub

PROJECTS

- Trainium — production e-commerce + admin system (PostgreSQL/Prisma, auth/roles, payments, real-time, i18n)
  Live • GitHub
- GitGuard Agent — CLI + web recovery flows with Python agent service
  Live • GitHub
- PatchPilot — FastAPI + Next.js workflow: video → analysis → Playwright tests → patch suggestions
  Live • GitHub
- Nestar / Burak / Leo Academy — backend-heavy local systems (NestJS GraphQL; Express session/JWT; Stripe + media pipeline)
  GitHub: Nestar • Burak • Leo Academy

EDUCATION

Sejong University — B.S. (in progress), expected graduation: Dec 2026
